PROFESSIONAL SUMMARY

AI/ML Developer and B.Tech CSE student (CGPA: 8.0) with 6+ shipped projects across workflow automation, RAG, NLP, computer vision, audio ML, and API-driven systems. Proficient in Python, TensorFlow, PyTorch, Scikit-Learn, LangChain, FAISS, FastAPI, Streamlit, n8n, Twilio WhatsApp, Airtable, and OpenWeatherMap API. Delivered outcomes including 93% model accuracy, 12+ hours/week saved, and 60% faster resume screening.

EXPERIENCE

Independent AI/ML Developer | Self-Initiated Projects | Remote Dec 2024 - Present

- Delivered AI/ML, automation, and full-stack prototypes independently, owning system design, coding, debugging, documentation, and release readiness.
- Managed data preprocessing, model training, REST API integration, deployment preparation, and GitHub version control across portfolio-grade solutions.
- Applied Python, TensorFlow, PyTorch, Scikit-Learn, LangChain, FastAPI, Streamlit, n8n, Airtable, Twilio, and webhooks in practical builds.

AI/ML Workshop Participant & Community Contributor | India Aug 2025 - Present

- Completed 4 certifications in AWS Cloud, ML, AI, and Generative AI, translating coursework into proof-of-concepts.

EDUCATION

Graphic Era Hill University, Dehradun Aug 2024 - Present

Bachelor of Technology, Computer Science Engineering | CGPA: 4.0

BBL Public School - Intermediate (Class XII) | High School (Class X)

PROJECT EXPERIENCE

Client Order-to-Invoice Automation

Workflow Automation | n8n, Airtable, Twilio WhatsApp, Webhooks, PDF Automation

- Architected an n8n order automation that ingests client requests through webhooks, creates Airtable invoice records, and dispatches WhatsApp confirmations.
- Streamlined order processing, saving 12+ hours/week by replacing manual tracking, record updates, and repetitive customer follow-ups.

Daily Weather Report via WhatsApp

Workflow Automation | n8n, OpenWeatherMap API, Twilio WhatsApp, Cron, HTTP Request

- Configured a cron-scheduled n8n job that pulls live weather data from OpenWeatherMap and sends morning WhatsApp reports through Twilio.
- Converted raw API responses into readable alerts covering temperature, humidity, wind speed, visibility, sunrise, sunset, and contextual tips.

Document Q&A RAG Assistant

Generative AI | LangChain, FAISS, OpenAI API, Streamlit, NLP

- Created a Retrieval-Augmented Generation assistant for PDF, TXT, and Markdown uploads with context-aware answers from document content.
- Designed parsing, chunking, embedding generation, FAISS indexing, semantic retrieval, and source-grounded responses, cutting reading time by 60%+.

Deepfake / Fake Audio Detection System

AI/ML | FastAPI, Android, Librosa, Python, Machine Learning

- Constructed a mobile-backed fake audio classifier with Android recording/upload features and FastAPI inference services.
- Extracted Librosa audio features and routed samples to backend prediction endpoints, covering preprocessing, response handling, and result display.

AI-Based Fake Medicine Detection System

Deep Learning | Computer Vision | TensorFlow, OpenCV, NumPy, Pandas

- Trained a CNN counterfeit medicine classifier on 5,000+ labelled images, achieving 93% accuracy for real vs fake identification.
- Enhanced performance by 15% through image preprocessing, augmentation, feature extraction, and iterative hyperparameter tuning.

Intelligent Resume Analyser

NLP | Machine Learning | Python, Scikit-Learn, NLTK, TF-IDF

- Parsed and classified 100+ resumes across 20+ technical and soft-skill categories with an NLP screening system.
- Ranked profiles through TF-IDF scoring and weighted keyword matching, reducing recruiter screening time by 60% and surfacing matches under 2 seconds.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, TypeScript

GenAI: LLMs, RAG, LangChain, FAISS, Prompt Engineering, OpenAI API

Web/App: HTML, CSS, React, Node.js, FastAPI, Streamlit, Android, Flutter

AI/ML: TensorFlow, PyTorch, Scikit-Learn, OpenCV, Librosa, NLP, TF-IDF

Automation: n8n, Webhooks, Cron/Schedule Trigger, REST APIs, HTTP Request, Twilio, Airtable, OpenWeatherMap

Data/Tools: NumPy, Pandas, Matplotlib, Power BI, SQL, MongoDB, Firebase, Git, GitHub, Docker, AWS, Postman

CERTIFICATIONS

AWS Cloud Fundamentals | Fundamentals of Machine Learning & Artificial Intelligence | Generative AI Certification | Be10X AI Workshop

LEADERSHIP & ACTIVITIES

- Coordinated 3-5 member teams on AI and web builds by setting milestones, assigning tasks, removing blockers, and meeting deadlines.
- Presented technical concepts at 5+ events and documented learning in vector databases, fine-tuning, automation engineering, and agentic architectures.
